

what is **spammm**?

Send Personalized and Meaningful Messages to Most (loved ones)

Spammm is a revolutionary new stupid idea that you always needed. It basically allows teenagers to annoy the heck out of their friends on social media and via phone and email, all for the low, low price of just 15 rupee per day!

You pay us, we spam them. But but... if you cancel the payment midway, oh dear, we'll have to reveal your name to that individual. But if you want to get protected from all the spamming, we've got you covered. No more than Rs. 500/month.

So the next time somebody annoys you, don't curse them, just **Spammm** them!
